Shaurya Sharma

Phone number: (+91) 7427824878 (Mobile) | **Email address:** shauryasofficial27@gmail.com | **LinkedIn:** https://www.linkedin.com/in/shaurya-sharmaa/

ABOUT ME

Computer and Communication Engineering student with strong interest in **Artificial Intelligence, Computer Vision**, and **Medical Imaging**. I have conducted research on the intersection of AI/ML/DL and their use in the Medical Field. I develop impactful AI systems that create autonomous workflows and intelligent agents for real-world.

SKILLS

Languages

Python | JavaScript | C/C++

Web Development

Nest JS | Next JS | React JS | Express JS | Node JS | SQL(Postgres) | Docker

AI / ML / DL

N8N | PyTorch | TensorFlow | OpenCV | Hugging Face | NumPy | Pandas

WORK EXPERIENCE

SOFTWARE DEVELOPMENT ENGINEERING INTERN – PAYTM – 05/2025 – 07/2025 – NOIDA, INDIA

Link : https://tinyurl.com/Paytm-Appreciation-Letter

- Engineered and relaunched the **complete payment gateway** for Liberty (US-based in Puerto Rico), **driving a 7% increase in conversion rate** with a **96% confidence level**.
- Built forms and **encryption protocols** with TransUnion (US), **reducing data vulnerabilities by 5% and ensuring 97% compliance with industry security standards.**
- Developed a **cross-client HTML email template** for M'ovil Panam´a (Spanish market leader), resulting in a **3% improvement in A/B test scores**.

PUBLICATIONS

2026

Comparative Study of Models based on Machine Learning and Deep Learning for Brain Tumor Segmentation

- Conducted a **multi-stage benchmarking study comparing 6 classical segmentation techniques vs. CNN architectures** for MRI-based brain tumor detection, demonstrating clear performance gains with deep learning.
- Implemented state-of-the-art neural architectures **(nnU-Net, VAE-UNet, 3D U-Net, Dense U-Net, Attention U-Net, Cascaded CNNs)** on BraTS-18/20/21 datasets for **full tumor/core/enhancing-tumor segmentation**.
- Suggested an **optimized medical image preprocessing pipeline** for multi-modal MRI (T1, T1ce, T2, FLAIR) enabling high-fidelity tumor region mapping.
- Achieved consistent performance gains validated through Dice and H95 metrics.

Authors: Shaurya Sharma, Mayank Goyal, Anshika Malsaria | **Journal Name**: International Conference on Smart and Distributed Computing | **Publisher**: CRC Press

2026

Synthetic Chest X-ray Image Generation for Pneumonia Classes Using GANs {On Going}

- **Developed a Conditional GAN (cGAN)** to synthesize class-specific chest X-ray images (Normal & Pneumonia), improving dataset diversity and addressing medical data scarcity.
- **Engineered a 20-layer Generator and a dual-output Discriminator**, integrating LayerNorm, label smoothing, and gradient clipping to stabilize adversarial training across 32,000 epochs.
- **Enhanced diagnostic model accuracy to 92.43%** by augmenting the dataset with high-fidelity synthetic images and training a VGG16 classifier on a balanced real synthetic dataset.

Authors: Shaurya Sharma, Gotham Kothari

EDUCATION AND TRAINING

08/2023 – CURRENT Jaipur, India
BACHELOR OF TECHNOLOGY Manipal University

Field of study Computer and Communication Engineering

PROJECTS

09/2024 – CURRENT
ERP Portal

- Built ERP-SYS, a full-stack academic ERP platform used by **35+ departments** to manage **79+ KPIs** tied to **QS & NIRF ranking metrics**, replacing manual spreadsheet workflows.
- Designed **4 role-based portals** (QOAC, HOD, Faculty Coordinator, Faculty) enabling structured KPI assignment, data entry, and review, improving KPI submission turnaround time by **60%**.
- Developed a **dynamic KPI builder and reporting engine** supporting **Excel/PDF import–export**, automated report generation, and progress analytics, reducing documentation overhead by **50%**.
- Implemented a scalable monorepo architecture using **Next.js, Node.js, Prisma, PostgreSQL, and Turborepo**, with shared UI and DB layers that reduced code duplication by **>60%** and simplified maintenance.

Link https://github.com/ERP-MUJ/ERP-SYS

06/2025 – 07/2025
$pendr - AI Optimized budget allocator

- Built $pendr, an AI-driven marketing budget allocation tool that **optimized ad spend by up to 40%**, automatically distributing budget across channels based on company niche and goals.
- Developed a strategy planner enabling companies to **generate personalized marketing plans within 60 seconds**, and compare previous budgets to newly optimized recommendations.
- Implemented an ad simulation feature allowing users to **preview how ads appear across 10+ real app & platform mockups, reducing design iteration time by 30%.**
- Created an AI scoring engine that **evaluates ad content against 7+ performance criteria**(copy quality, visual clarity, CTA strength), **achieving 3× faster content validation and improving ad performance.**

HONOURS AND AWARDS

14/09/2025
Achieved 2nd Position in MUJ's Biggest Hackathon, Hacks – ACM Manipal University Jaipur

We Achieved 2nd position in MUJ's Biggest Hackathon, Hacks. We had built $pendr. An AI based funds optimizer. The same project has been in detail explained in the projects section.

State Level Qualifier in the biggest hackathon of India, Smart India Hackathon. – Government of India

My team had qualified for State Level Competition in India's Biggest Hackathon, SIH. We had build a **Wearable sensor with Artificial Intelligence for prevention of falls in elderly people.**
We had build a wearable sensor-based solution designed to predict and prevent falls in elderly individuals. The system comprises a wristband equipped with advanced sensors (MPU9250, SpO2, heart rate), an SOS button, and a cloud-connected infrastructure that analyzes real-time data. The wristband tracks heart rate, oxygen levels, and walking patterns using AI to predict potential falls before they happen. It also detects live falls and immediately sends alerts via SMS or app notifications to caregivers. A local cloud setup ensures secure data storage and analysis, with future scalability to AWS.

RECOMMENDATIONS

Dr Arjun Singh HoD Computer and Communication Engineering Department

I have known Shaurya since the beginning of his 4th semester, when I taught him the course Software Engineering, and since then, I have had the opportunity to observe his academic performance, growth, and character very closely.
He has my highest endorsement. I believe he will be an asset to your organization and will carry forward the values of discipline, integrity, and scientific curiosity that he has consistently demonstrated.
